THERMOSEAL®
A KLINGER Company

GASKET AND BOLTED JOINT TRAINING

Fluid Sealing Training Course

Our goal for this in-depth gasket training is the same as yours: We want to help you confidently sell high-quality products at greater volumes.

Thermoseal's gasket and bolted joint training course includes a comprehensive overview of today's competitive and price-driven marketplace. Topics covered in this course provide thorough details of the complexities of flanged joint assemblies and the function of the gaskets used to safely seal them.

This training offers immediate and relevant knowledge to become a reliable information source. Attendees will leave with an enhanced familiarity of industry standards and gasket terminology to confidently partner with end-users, engineers and decision makers.

Classes are held at our factory headquarters in Sidney, Ohio and at our Houston, Texas factory. We can also customize the course and conduct training on location for your sales team or for your end user customer. Please call for more information.
